

EMERGING POLICY ISSUES RAISED AT  
INTRODUCTION TO RESTORATION TARGETS WORKSHOP  
11/19/96

- Do we need flow targets?  
If so:
  - How do we set flow targets?*
  - How do we incorporate them into Ecosystem Restoration Targets?*
- What will be the impacts of ecosystem restoration on agricultural land?
  - How do we ensure adherence to Solution Principles?*
  - How do we address private property rights issues?*
- How will Targets help achieve the Ecosystem Quality goal and objectives?
  - How will we know when goal and objectives have been met?*
  - How do we set benchmarks for measuring success of ERPP program as a whole?*
  - When will we know that we have reached the ER vision?*
  - What indicators do we use for monitoring?*
- How do we integrate related programs and goals into the CALFED Ecosystem Restoration Program?
  - How do we ensure consistency with CALFED goals and objectives?*
  - How do we identify and address inconsistencies between the programs?*
- How will long-term CALFED project funding decisions be made?
  - How will the public be involved?*
